1M IDEAS 26'

Cubik.One One million ideas

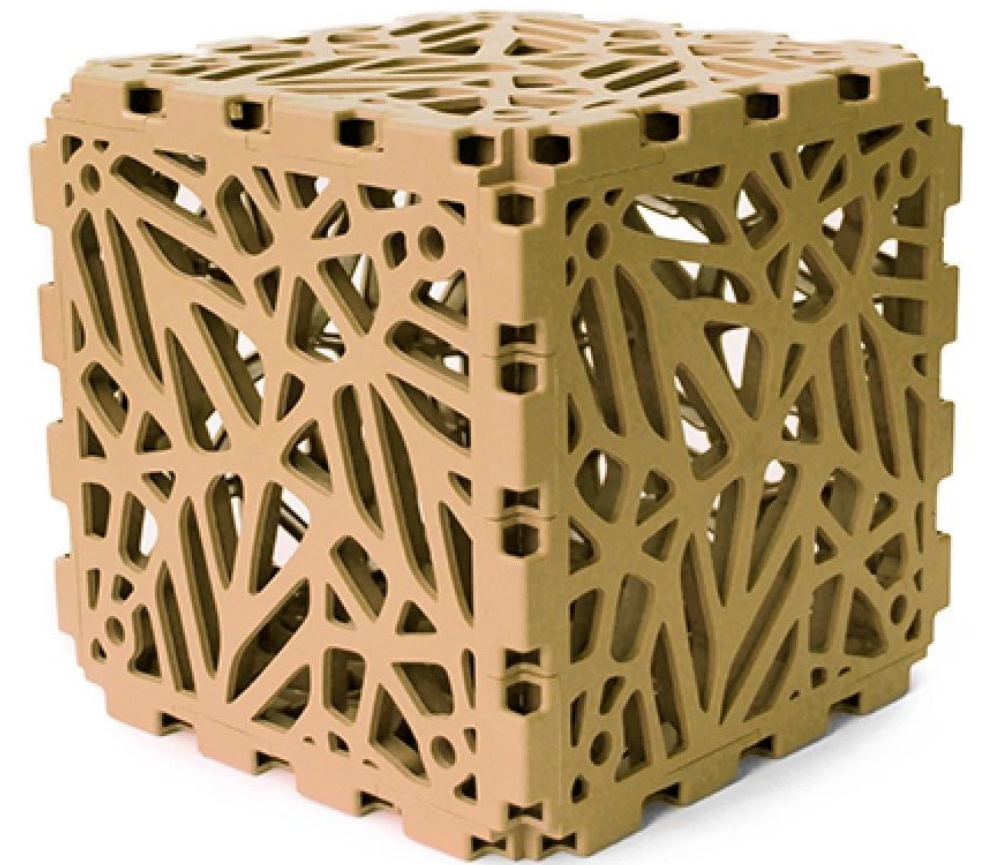

Every great idea begins as a single thought, and the true challenge is shaping that thought into clear meaning. Intentional design bridges the space between inspiration and execution, turning concepts into reality. Whether imagining new forms, crafting a story, or presenting ideas that matter, Cubik.One is a system for a million ideas, transforming vision into structure.

1.5_t

static vertical load per cube

One cube: 22.5 cm edge, six facets that snap together by hand. Cubes join with clips into walls, counters, benches, planters and stands. Everything comes apart and is rebuilt for the next task.

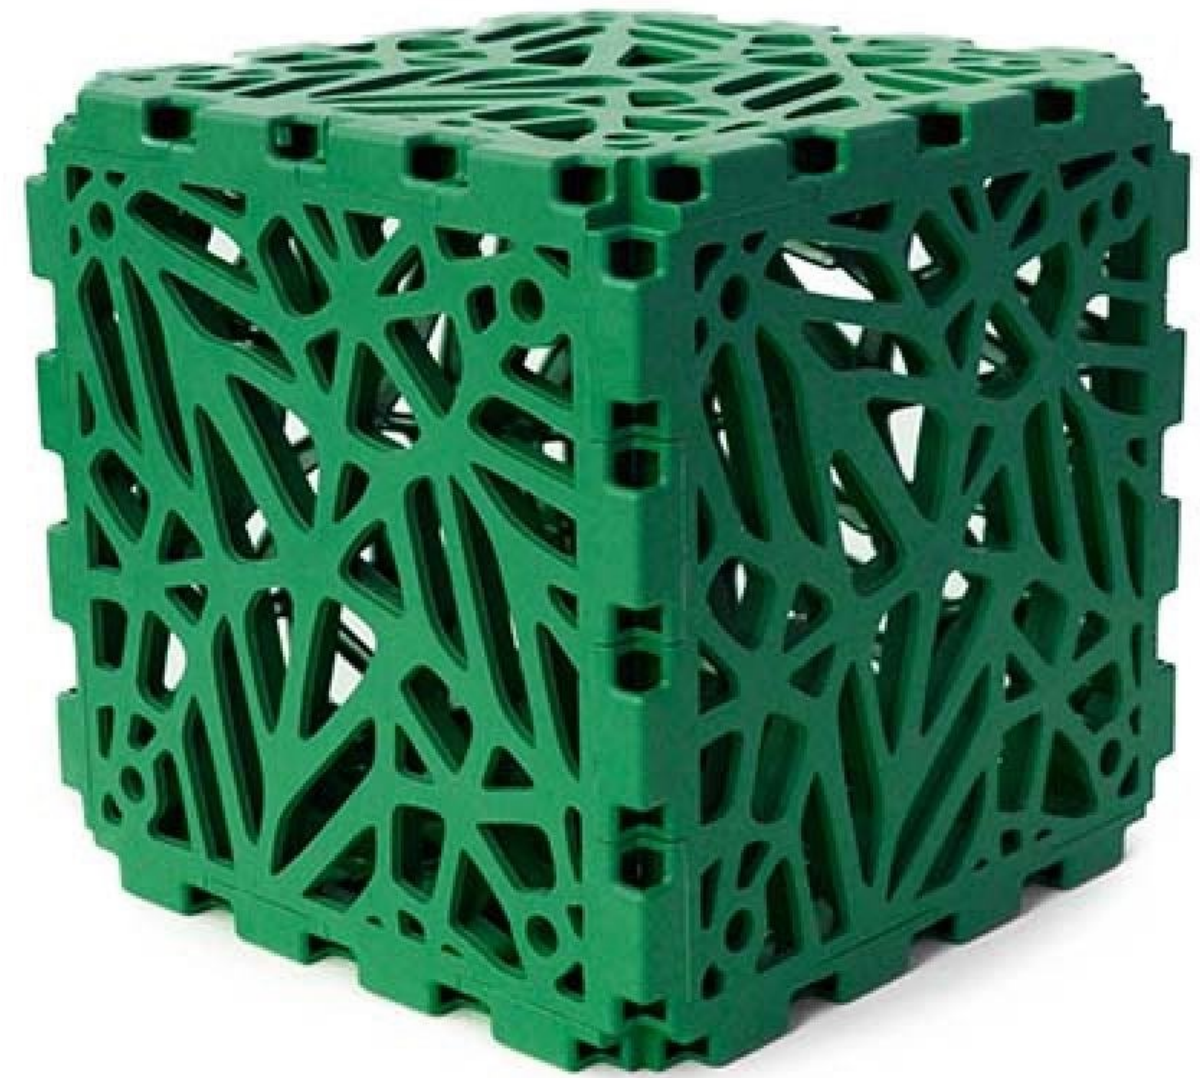

About Us.

We are created for those who want to do everything themselves — easily, beautifully and in their own way.

Five years of development. Fifteen prototypes. One goal: build anything you need, as simple as playing with blocks. Production is based in Asenovgrad, Bulgaria. Our team of enthusiasts also works across various countries, designing every component in-house — cubes, connectors, and accessories.

SETS

01

Furniture

Seating, counters, coffee tables and storage for exhibition stands, offices, waiting areas and shops. Assembled by hand, without tools: plan 1.5–3 minutes per cube for one person. Taken apart when the layout changes and stored disassembled between uses. Mobile furniture: not for fixed installation or escape routes.

Furniture

From seating zones to product counters and full stands — one modular system that assembles by hand and fits the next layout.

124 Zen grey

4 Flora grey

Assembly: 2–4.5 hours for one person.

02

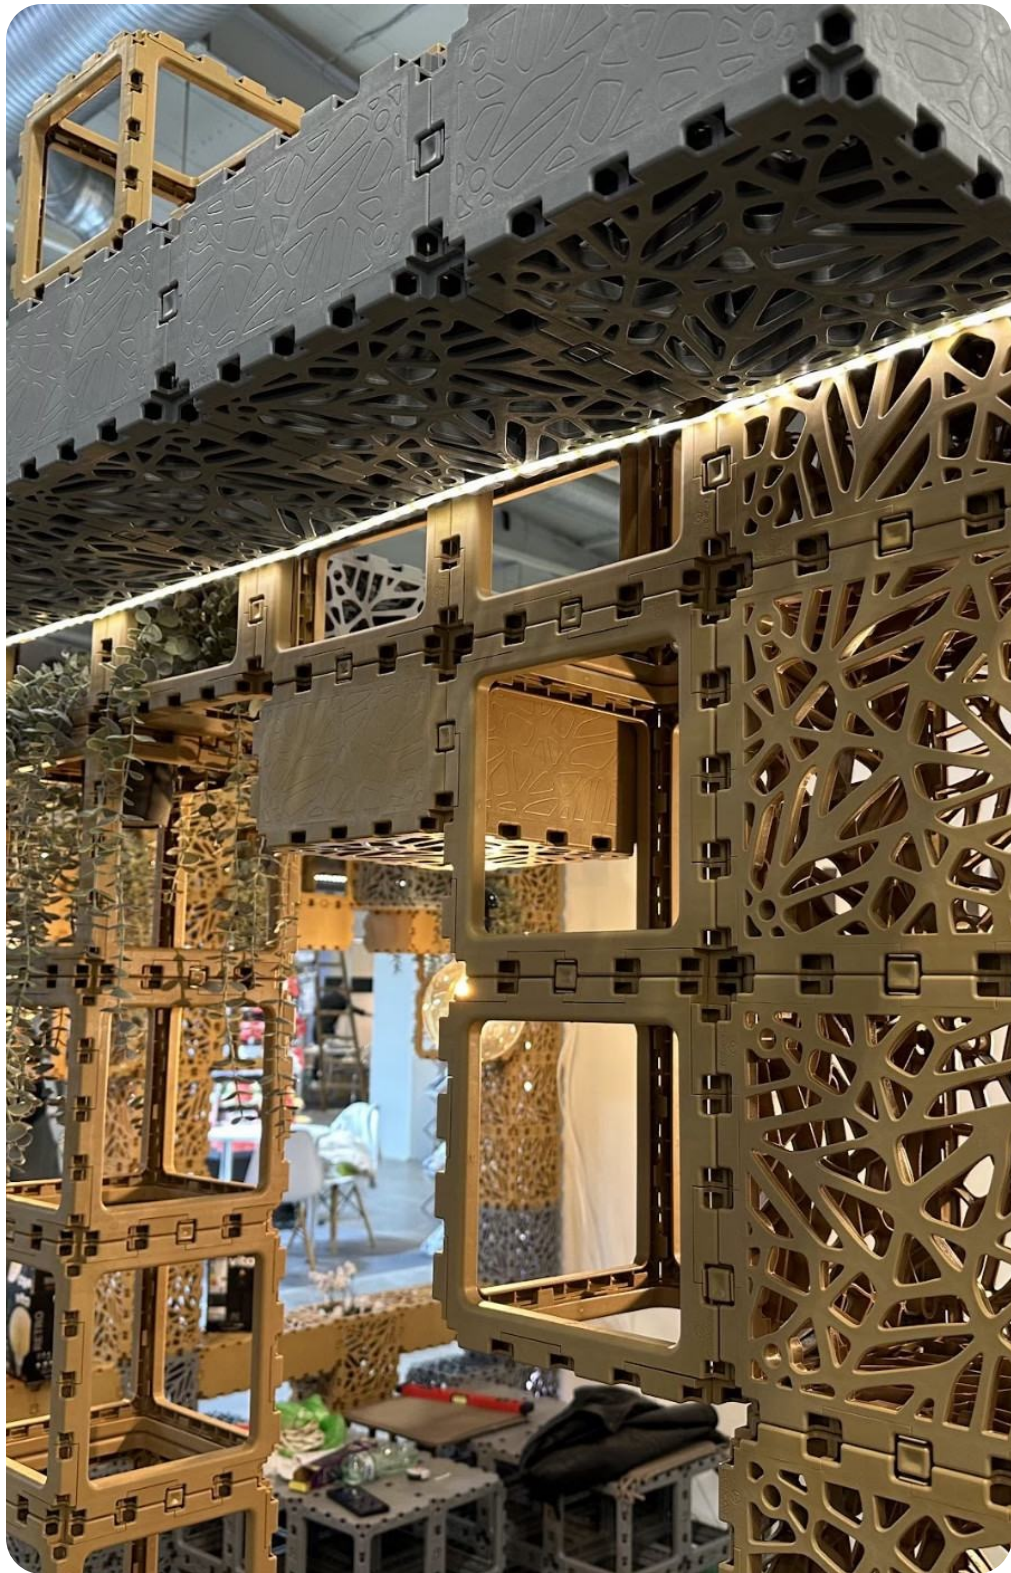

Exhibitions

Stands, counters, demo zones and lounges from one set of parts. After the show the stand comes apart, ships disassembled and is built in a new layout for the next event. Assembly: a stand of about 360 cubes takes one person 9–18 hours, a crew of three 3–6 hours.

Exhibitions

Stands built from Cubik parts at exhibitions in 2025.
